**To:** Information Network Security Administration (INSA)

Addis Ababa, Ethiopia

**Subject:** Request for Security Assessment of Rasynergy Digital Platforms

Dear Sir/Madam,

Rasynergy Digital Card Solution and Printing Company, based in Addis Ababa, is developing two digital platforms with integrated payment systems:

1. **Digital ID Payment Platform** – <https://rasynergy.et>: Enables users to purchase digital ID cards and student materials with Telebirr and other digital payments.
2. **School Management System** – <http://rasynergy.et:3003>: A full-featured school administration platform with built-in payment functionality.

As we prepare to deploy these systems for multiple clients, we kindly request INSA to conduct a comprehensive security assessment. This will help ensure compliance with national standards, identify potential vulnerabilities, and secure the payment integrations.

We appreciate your support and look forward to your guidance on the next steps.

**Sincerely,**

Rasynergy Digital Card Solution and Printing Company

Address: Yeka Kotebie 02, Addis Ababa, Ethiopia
